PROFILE

Web designer and developer with a strong front-end foundation (HTML, CSS, JavaScript, jQuery, Bootstrap, Tailwind CSS) and growing back-end capability in PHP and MySQL/database administration. Experienced managing the full lifecycle of client websites end-to-end — design, build, launch, and ongoing maintenance — across insurance, hospitality, travel, e-commerce, food, and healthcare brands. Comfortable owning a site's day-to-day upkeep, performance, and content updates, and coordinating directly with stakeholders to keep a brand's online presence accurate and current.

CORE SKILLS

Front-end: HTML, CSS, JavaScript, jQuery, Bootstrap, Tailwind CSS, responsive & mobile-first design

Back-end: PHP (intermediate), MySQL & database administration (developing)

Site Management: Content updates, performance & responsiveness checks, cross-browser QA, basic SEO hygiene

Design: UI/UX, animated preloaders, scroll-reveal animation, video integration, brand-consistent visual systems

Other: Client communication, proposal writing, project coordination, Figma-to-code handoff

EXPERIENCE

Freelance Web Designer & Developer — Cursor Software Nigeria (formerly TJ's Web Design)*Lagos, Nigeria*

- Manage full website builds end-to-end for clients across insurance, travel, hospitality, food, interiors, and healthcare — from initial design through launch and post-launch upkeep.
- Delivered a multi-page site for Limpid Insurance Brokers Limited, matching brand colour standards and adding a preloader, staff bio modals, and a custom-processed transparent logo.
- Built and later fully redesigned the website for Edscan Travels & Tours, and delivered a luxury travel site for Fidella Travels & Tours with a navy/gold aesthetic and animated preloader.
- Built the website for Ruvan Homes, a Lagos luxury short-stay apartment agency, with heavy emphasis on rich media (image/video) handling and strict layout containment.
- Delivered brand websites for Kuli and Kilishi Hub (food), Sam's Cut Barbershop, Ronnie Interiors, and Sol's Pet Care (a Nashville-based client), each with a distinct visual identity.
- Used Figma's developer-handoff tooling to recreate accurate front-end builds from client mockups, including for Hamkad Hospital and Fidella Travels.
- Applied a consistent technical standard across projects: animated preloaders, strict image/video containment, scroll-reveal animation, and full mobile responsiveness.
- Wrote client-facing proposals and pricing packages, and led cold outreach to bring on new clients.

SELECTED PORTFOLIO

- Agro-processing business website — fully responsive brand site
- SaaS accounting platform — cloud accounting product UI design
- Clothing e-commerce store — designed and later revised for improved UI/UX
- Social media analytics dashboard — monitoring & reporting interface
- Educational platform websites — two learning-platform projects
- Fragrance e-commerce shop and fashion/apparel e-commerce platform
- Dual-purpose car dealership website — showroom display plus online booking
